

Finding Forces

Go outside and find a spot to sit quietly for 10 minutes. Look for any movement. *Do you see a leaf fluttering down to the ground, or a branch or flower moving in the wind?*

In the three boxes below, draw the thing you are observing. Use arrows → to show its movement. Fill in the blanks to describe what forces are making it move.

First

Draw what you see happening first:

The *(name of object)*

is *(describe movement)*

It went this way because *(describe the force)*

_____.

Next

Draw what you see happening next:

The *(name of object)*

is *(describe movement)*

It went this way because *(describe the force)*

_____.

Last

Draw what you see happening last:

The *(name of object)*

is *(describe movement)*

It went this way because *(describe the force)*

_____.
